LITERARY NOTES.

-For the past five years the Century Company has been engaged in preparing a dictionary of the English language, of which Professor William D. Whitney, of Yale College, is editor in-chief-the purpose being to make a more comprehensive work than has vet appeared in popular form, to in clude, in addition to a very full collection of individual words in all departments of the language, all technica phrases, not self-explaining, in law, the mechanical arts, the sciences, etc. dictionary so complete in its definitions of all branches of science and art that even the specialist will need nothing further. The number of "new" words in many of these departments is said to be surprisingly great. The dictionary will have also a remarkably complete system of cross references, and will embody in itself a dictionary of synonyms which will add greatly to its value. A prominent feature of the new work will be its encyclopedic character. Its definitions will be fuller and more complete than is customary in works of this kind; it will go further into the various uses and meanings of words, and in many cases will give full explanations and descriptions of matters historical, scientific, legal, mechanical, etc. Quite an army of falo, N. Y. persons has been at work for several years reading standard American and English books in search of quotations, of which an immense number will be used. American writers, such as Emerson, Lowell, Hawthorne, Irving, Whittier, Longfellow, Holries, and our distinguished scientists, are receiving special attention. The publishers are taking great pains with the illustrations, of which there will be about 5,000. They are employing the same class of artists and engravers that contribute to their magazines, and they mean to make the result

The second play of the series will be the Taming of the Shrew, as par alleled with the prior Taming of a Shrew, of 1594, with critical Introduction by Mr. Albert R. Frey, of the Astor Library. It is a compilation of dishes used by Buddhists in Europe and the East, interspersed with explanations of the religious convictions of this great Sect regarding foods. The work will arouse general curiosity, and be of value to Vegetarians-of whom there are large numbers in this country. Mrs. Holloway writes with authority on this subject, having been for some months in Buddhists' home in England and Prussia, where she enjoyed the advantages of an unmixed vegetarian diet. The book is a quaint brown and white conceit in parchment covers. Price, 50 cents.

-The Atheneum speaks of the Pope's Memoirs which Charles L Webster & Co. are to publish as "a life of his Holiness which is now being written by Dr. Bernard O'Reilly, based on an authentic memoir furnished by the Pope himself," and says that the work will be published simultaneously in London (by Sampson Low) and New York. Translations will be issued by the houses of Firmin Didot & Co., Paris; J. P. Portraiture Invented by Silhouette. Until Daguerre made his discovery the wealthy had their miniatures painted on ivory, but the cheaper portraiture invented by Silhouette was very common. Protile cutters, as they were called, were found in all cities and large towns, while others went about the country from house to house, so that it was rare to find a sitting-room in any decent house that did not boast of a frauned silhonette, one looking to the right and the other to the left. There were different ways of arriving at the same result, but the work was chiefly done by cutting the profile out of white paper. which was backed by a piece of black

silk or black paper neatly mounted. To insure success it was necessary to have a steady hand and a correct eve; with these qualities one could cut a likeness in a few seconds. There was also several mechanical contrivances for producing silhouettes, one of which Sam Weller doubtless had in his minu's eye when, in indicting his valentine to Marv. he likened the growth of his love in its rapid operations to the "profeel machine," which "does finish a portrait and put the frame and gloss on complete, with a hook at the end to hang it up by, and all in two minutes and a quarter."-New York Home Journal.

Many persons, though well acquainted with flowers, are unaware of the changes through which the seedling tulip passes.

Curious Changes of Flower.

It is four or five years before it flowers, then it takes on the self-colored or breeder form; but in the breeder state it is easy to class it with the bizarres, roses or bybleemens, according as it may belong to either of these three divisions. Then, at the expiration or sometimes one or two years up to six or seven years, it breaks into its true character, and becomes what is termed "rectified." Why the tulip should be an exception to the universal law observed in seedling flowers, and have an almost exceptional, intermediate state, passeth knowledge. The practical florist asks of the botanist the why and wherefor of this, and no reply is forthcoming. It is said that in the whole range and history of plants there is no analogy to this phenomenon. - Vick's Magazine.

Warmed-Over Tea Not Wholesome. Sewing-girls and, indeed, all women who are in the habit of making for themselves a cup of tea are warned against the careless habit of leaving any or to be taken cold at an hour much ater than when it was made. The tannin which tea that has been long standing contains does a great deal of mischief. A little weak tea, newly made with freshly-boiled water, is not hurtful taken once or twice a day, but strong tea or tea that has been standing is decidedly injurious.
